

PSYCHIATRIC AND ADDICTIONS TREATMENT

Bournewood Hospital is a leader in providing psychiatric and addictions treatment services for adults and adolescents presenting with acute symptoms who are in need of short-term stabilization of clinical conditions. Founded in 1884, Bournewood has a long history of excellence. The hospital's main campus in Brookline, Massachusetts, provides a full continuum of care for adults and adolescents, which includes inpatient, partial hospital, intensive outpatient, and traditional outpatient treatment focused on both psychiatric and addictions/dual diagnosis disorders.

The Bournewood-Caulfield Center in Woburn, Massachusetts, provides partial hospital and intensive outpatient services for adults with psychiatric and addictions/dual diagnosis disorders. This comprehensive continuum of services allows patients to access the most appropriate level of care at any point during their course of treatment.

Bournewood also provides traditional outpatient services at its office in Brighton, Massachusetts and has affiliations with several outpatient practices and sober home programs throughout greater Boston. These and other outpatient and community resources provide continued treatment and support essential for patients striving to sustain their recovery upon their return to the community.

Bournewood Hospital is fully licensed by the Massachusetts Departments of Mental Health (DMH) and Public Health (DPH), is fully accredited by the Joint Commission (JC) and is certified by the Federal Centers for Medicare and Medicaid Services (CMS). Bournewood also meets all state and municipal public safety standards and the federal requirements to maintain a methadone detoxification license.

Bournewood's services, which are covered by most major insurance providers, include:

- Psychiatric physicians on campus 24 hours per day, 365 days per year
- Triage, assessment and admissions 24 hours per day
- Five inpatient units, including a discrete adolescent unit
- Adult and adolescent partial hospital, intensive outpatient and traditional outpatient programs
